A Question of Genetics

Someday the science of genetics may be powerful enough so that it will be possible to predict from one's genes at birth the year when one will die of natural causes (assuming that one has not died accidentally before that date).

If this were true today, would you want to know your anticipated year of death?

- Definitely Not** **Probably Not** **Probably Yes** **Definitely Yes**

If this were true today, at what age if any would you wish to be so informed:

- As early as possible** **Around 10** **Around 20** **Around 30** **Around 40** **50 or older**
